

Becky Baltz, District Engineer

SINGLE FEASIBLE SOURCE PURCHASE POSTING NOTICE

The Missouri Department of Transportation has determined that only one source can provide the products or services described below

Title: Trimble GPS, R-8 Base & 2 Rovers (complete system) &
Trimble Business Center Survey Advanced Office Software
SFS 7-080925 Trimble GPS

Description: The Missouri Department of Transportation (District 7) has determined that only Seiler Instrument can provide the Department with proprietary upgrades and compatible GPS equipment. District 7 is currently using Trimble GPS systems in our Survey and Construction Departments. MoDOT District 7 has determined the need to have compatibility of using the same brand of GPS equipment to integrate crews, without having to acquire additional training because of purchasing different types of equipment. This will reduce training time and allow more opportunities to share resources. If equipment problems develop and the system doesn't work properly then pieces can be replaced a piece at a time to identify the source of the problem. The Trimble office software is compatible with District 7's existing GPS systems. Seiler Instrument is the regional distributor for Trimble equipment in the District 7 area. Seiler Instrument is also offering the previous Missouri contract price on this purchase and allowing a trade-in offer for a limited time on specific pieces. Purchases relating to this product are estimated to be \$68,508. Questions relating to this single feasible source posting may be directed to Cathy Bay at 417-629-3223 or via email at cathy.bay@modot.mo.gov.
