

Other Frequently Asked Questions

What should I do if an emergency vehicle is approaching?

If you are inside the roundabout, proceed to your desired exit, exit the roundabout, and pull to the side of the road. Just remember to not stop inside the roundabout, as this could prevent the emergency vehicles from passing and prevent other vehicles from exiting the roundabout.

How do pedestrians cross?

Pedestrians should follow a few rules when crossing any roundabout:

- Cross the roadway to the median, using it as a refuge area to wait for a safe gap.
- Always look for vehicles and make sure that all motorists can see you. Never assume that a motorist can see you or intends to stop for you.
- Stay on the sidewalk. Never walk in the roundabout or cross to the circular island.

What about bicycles?

Depending on their comfort level, bicyclists have two options when navigating a roundabout:

- Use the shared pedestrian/bicycle paths and crosswalks, following the same rules as pedestrians as listed above.
- Ride through the roundabout with vehicular traffic, following all of the same rules as motorists.

The Ins and Outs of Driving Multi-Lane Roundabouts

All About Roundabouts

A Step by Step Guide to Driving Multi-lane Roundabouts

A roundabout is an intersection where left turns are routed around the far side of a circular island. By following these easy steps, you'll be driving roundabouts like a pro in no time.

STEP 1

As you approach a multi-lane roundabout, slow down to the advisory speed and prepare to stop if necessary.

SLOW DOWN

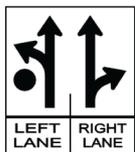

STEP 2

Get in the appropriate lane well in advance of the intersection. Lane use signs will always show which lanes can be used for different turns. In this example:

- Right turns must use the right lane ONLY.
- Left turns must use the left lane ONLY.
- In this example, the sign shows that you can go straight through from either lane.

CHOOSE THE PROPER LANE

STEP 3

Just before you get to the roundabout, be sure to watch for any pedestrians in the crosswalk.

STOP FOR PEDS

STEP 4

When you reach the roundabout, do not proceed beyond the yield sign until **all** cross traffic is clear. Never attempt to enter the intersection alongside crossing traffic, as those drivers have the right-of-way to exit the intersection.

YIELD ON ENTRY

STEP 5

When there is a safe gap in **all** lanes of crossing traffic, proceed into the intersection, keeping to the right of the center island. Stay in your lane. Don't change lanes within the roundabout. As with any other type of intersection, you must be in the proper lane before entering.

ENTER THE ROUNDABOUT

STEP 6

Once you've safely entered, you have the right of way. When you reach your desired exit point, simply proceed straight ahead out of the roundabout.

EXIT THE ROUNDABOUT

STEP 7

Be sure to watch for any pedestrians as you exit the roundabout, and be sure to stop for any pedestrians within any crosswalk.

STOP FOR PEDS
