

Hi, this is Sally Oxenhandler with your MoDOT minute.

It's a troubling statistic: young drivers are involved in 29 percent of traffic crashes. To help shrink that number, MoDOT has launched a Web site dedicated to teens. [savemoyouth.com](http://savemoyouth.com) attracts young drivers through videos, games and other interactive features. The site encourages teens to get involved and stay safe on Missouri roads, while encouraging their peers to do the same.

On the flip side, MoDOT is joining a national effort focusing on older driver safety. A core set of intervention programs helps older drivers assess their driving ability and make adjustments. The programs are offered in Kansas City, St. Louis, Springfield, Columbia and Cape Girardeau. For more information, visit [modot.org](http://modot.org).

That's been your MoDOT Minute. Visit [modot.org](http://modot.org) every Tuesday for new information.
