

UPCOMING ROADWORK

Intersection of Route 61/Main Street & Route HH/ZZ in Sikeston

DESCRIPTION

The project includes pavement improvements at the intersection of Route 61/ZZ/HH and Main Street in Sikeston. The intersection is located near the Southeast Missouri State University Satellite Campus. Route HH connects to Interstate 55.

TIMELINE & TRAFFIC IMPACTS

Improvements will begin Monday, Aug. 22, weather permitting. Work will be staged to allow traffic access to the intersection, but lane reductions will be in place. Motorists are encouraged to seek alternate routes or allow extra time for delays. In addition, longer delays will occur when traveling through the intersection at peak traffic times. The current traffic signals will be temporarily disabled, and the intersection will be treated as a four-way stop during construction. Completion is anticipated in late September, weather permitting.
